

The Six C's
Emergency Management Specialists

First Attack: Fire Extinguisher & Fire Blanket - Live Fire Training

Duration: 2.5 hours

Classroom and Practical Live Fire Training – All students will demonstrate the effective use of a Fire Extinguisher and Fire Blanket (fire hose where applicable)

Training designed to suit your workplace requirements and comply with:
AS 3745 - 2010: Planning for emergencies in Facilities and;
AS 4083 - 2010: Planning for emergencies in Health Care Facilities.

Learning outcomes: - Students will understand the:

- actions to be followed when initial response action is not safe
- appropriate initial response equipment
- facilities that may be used to confine emergencies
- hazards involved with initial response action
- implications of the incorrect use of equipment
- limitations of initial response equipment
- limitations of use of emergency control equipment or facilities
- classes of fire
- methods of extinguishment
- safe use of initial response equipment
- situations that must not be responded to because of the risk
- types of emergencies
- workplace procedures

Training is delivered by qualified, professional and experienced female and male instructors in a fun and caring learning environment.

On successful completion students will receive a certificate of completion

All students should wear appropriate clothing attire, to suit the outside environmental conditions.
