

# WORKING IN DISASTER RECOVERY?

## *A practical course for Council Staff*

Disaster recovery work is complex, requiring strong coordination, clear communication and a solid understanding of systems, principles and community needs. Council staff play a critical role in supporting communities to recover and rebuild after disaster.

This one day, practical course builds foundational recovery capability for staff working in disaster recovery or seeking to strengthen their practice. It combines national frameworks with practical tools, real-world insights and award-winning approaches to community-led recovery.

### **This course will:**

- Translate the National Principles for Disaster Recovery into practical tools you can use for planning, decision-making and delivery.
- Introduce best-practice and award-winning approaches to disaster recovery communication and community engagement.
- Enable you to apply data and local context from your own LGA through practical activities.
- Build your confidence to support and enable community-led recovery.
- Equip you with practical tools and resources to strengthen your recovery practice.
- Provide a safe, supported environment to practice new skills and approaches.
- Strengthen your ability to support your own wellbeing, your team, and affected communities throughout the recovery journey.

*Delivered by award winning disaster recovery practitioners.*

*Participants will gain practical tools, increased confidence, and a stronger understanding of how to support effective, coordinated and community-focused disaster recovery.*

Delivered by Sue & Mat
